

1. What is the IP address of the infected Windows client? - 172.16.8.49
2. What is the MAC address of the infected Windows client? - 00:12:f0:28:d4:34
3. What is the host name of the infected Windows client? - DESKTOP-5NLV63K
4. What is the user account name from the infected Windows client? - rvance
5. What is the full name of the user from the user account? - Raymond Vance

What is the IP address of the infected Windows client?

The alert contains several IP addresses reportedly associated with infostealer malware. We will investigate these indicators to determine whether the affected host shows signs of an infostealer infection or related malicious activity.

We can check it with this query:

```
http && ( ip.addr==172.64.155.76 || ip.addr==146.59.71.167 ||
ip.addr==38.182.168.246 || ip.addr==45.130.41.161 ||
ip.addr==172.67.162.153 || ip.addr==121.54.163.148)
```

C2 activity often exhibits the following characteristics:

- 1) Periodic or interval-based communication with external servers (beaconing).
- 2) Asymmetric traffic volume between the client and the C2 server.

So in our case both indicators in points 1 and 4 coincide

Also, interesting for us are points 2 and 3 because point 2 shows a situation in which the internal host sends a large amount of data to the server, while the server sends back a small amount of data. This behavior is similar to exfiltration. Point 3 is also strange because all requests from the internal host have unusual URIs and encoded payloads.

Answer: 172.16.8.49

What is the MAC address of the infected Windows client

We can find it in the ARP logs

Query: *arp*

No.	Time	Source	Destination	Protocol	Length	CNameString	src po	dst po	Info
103_	02:10:36	Dell_21:95:a6	Intel_28:d4:34	ARP	42				Who has 172.16.8.49? Tell 172.16.8.8
103_	02:10:36	Dell_21:95:a6	Cisco_39:ba:41	ARP	42				Who has 172.16.8.1? Tell 172.16.8.8
103_	02:10:36	Intel_28:d4:34	Dell_21:95:a6	ARP	42				172.16.8.49 is at 00:12:f0:28:d4:34
103_	02:10:36	Cisco_39:ba:41	Dell_21:95:a6	ARP	42				172.16.8.1 is at 00:22:56:39:ba:41

Answer: 00:12:f0:28:d4:34

What is the host name of the infected Windows client?
What is the user account name from the infected Windows client?

To answer these questions, we can check the Kerberos logs

Query: *kerberos.CNameString*

No.	Time	Source	Destination	Protocol	Length	CNameString	src po	dst po	Info

Answer: DESKTOP-5NLV63K, rvance

What is the full name of the user from the user account?

To answer this one, I used the search for the word "Vance" because I noticed that the username "rvance" was created using the first letter of the name and the last name.
